## UNIT SUBSTATION DISTRIBUTION CENTRE

### MODEL #DUS

- EEMAC 3R enclosure, powder coated finish
- Designed as a weatherproof portable or fixed mount combination transformer distribution panel assembly
- Primary main supply breaker internally fitted (optional fusible) is available
- Energy efficient, custom, robust design. Transformer is designed for easy access with various adjustable voltage taps
- Load side, bolt-in breaker panel gives selection for unlimited branch protection size
- Patented side receptacle device plates are available in multiple sizes and styles for easy on-board receptacles of alternative sizes. Makes adding outlets as needed quick, safe and easy.
- Units are available in skid mount, pad mount or a combination of both
- Fully CSA certified assembly

#### Options

- Primary line side CDP, breakers and outlets
- Primary main circuit breaker or fused disconnect
- Quick connect entry and load cable access boxes
- Device plates and outlets
- Factory panel breaker
- Contactor controls and logic (e.g. PEC)
- Full steel protective cage
- Enclosure types 3R, 4, or 4X in steel, stainless steel or aluminum construction

Shown is Model #DUS-C1 portable style, complete with device plates.
